

Our End-to-End Guarantee

- Guaranteed study start-up time
- Guaranteed enrollment
- Guaranteed price with no CRO initiated changes in scope
- Guaranteed database lock date

How can CROMSOURCE do this?

- Realistic and deeply detailed feasibility analysis
- Operational excellence within a cohesive team
- Excellent, long-term relationships with sites, investigators, and KOLs

Study History Overview

A successful clinical development program in Endocrinology and Diabetes must take into account the evolving global regulatory requirements in this therapy area. The trend is for longer, more complex trials which further increase budget and timeline challenges.

With offices throughout the US and Europe, and deep recent experience (50+ studies, 50,000+ patients and 12,000 sites in the past 5 years in Type II Diabetes alone) **CROMSOURCE** is well positioned to make your study a solid success.

50+ studies, 50,000+ patients, 12,000+ sites*

Phase I	Phase II	Phase III	Phase IV	Registry
7	9	23	7	5

**Type II Diabetes, data for last 5 years*

Over the years we have developed close relationships with Endocrinology experts and Key Opinion Leaders and created a trusted network of high-quality endocrinology research sites across Europe and North America. We are also experts in the management of third party vendors such as central laboratories, whose importance in delivering endpoint data for these trials is considerable.

Endocrinology Experts

CROMSOURCE's Endocrinology and Diabetes experience in the last 5 years includes over 60 studies with medicinal products in thousands of patients in Phase 1 through Registry and with Medical Devices at Pilot and Pivotal study stages.

Studies in both of these areas have been performed across Europe and North America.

We have completed studies in a wide range of conditions including but not limited to Hyperparathyroidism, Type I Diabetes, Type II Diabetes and Obesity. Significantly we have completed several studies including pediatric subjects. Through our endocrinology expertise, CROMSOURCE adds immediate value to your project.

Identify Countries & Sites for Maximum Enrollment and Retention

CROMSOURCE has developed a stringent methodology to help sponsors identify the highest enrolling countries and sites during the Feasibility stage. Our unique Feasibility Plus™ approach is provided to potential clients without obligation at the RFP stage and is the foundation of our ability to offer sponsors a guaranteed timeline, enrollment and budget.

Working closely with our clients, **CROMSOURCE** identifies those geographic areas well known for their prevalence of the targeted indication. All regulatory requirements are reviewed and timelines developed for each country to ensure the best regulatory strategy. **CROMSOURCE** then works directly with the most professional and productive sites in each geography. Sites are only considered if they have proven they can deliver a combination of high enrollment, high retention and quality data.

With the accurate and detailed trial planning data provided by Feasibility Plus™ **CROMSOURCE** confidently offers Sponsors a comprehensive End-to-End Guarantee, assuring them that their study will be completed on-time and on-budget with no CRO initiated changes in scope.
