

Why CROMSOURCE VISION?

- High level expertise in Ophthalmology
- Global reach
- Full-service capabilities
- Best in class metrics for on-time, on-budget project delivery

Who are CROMSOURCE VISION?

CROMSOURCE Vision is part of CROMSOURCE, a leading provider of clinical life science services to the pharmaceutical and medical device industries. CROMSOURCE has over 20 years of expertise in delivering outstanding clinical research services in locations across the globe.

CROMSOURCE Vision clients benefit from specialist levels of therapeutic area experience, coupled with fully-comprehensive in-house services and outstanding customer focus.

Delivering Excellence

- Realistic and deeply detailed feasibility studies
- Operational excellence within a cohesive team
- Excellent, long-term relationships with sites, investigators, and KOLs
- High levels of staff retention and project team stability

The CROMSOURCE Vision Advantage

Sponsors developing ophthalmic products may seek out niche CROs who boast high levels of therapy area experience. However, such CRO partners are not often able to offer a full range of in-house services, such as biostatistics, safety, regulatory, medical writing or technology applications. Furthermore, such niche CROs typically do not offer an international footprint and global capability, or the reassurance of 20 years of independent, steady growth.

CROMSOURCE Vision is the ideal partner. We combine high levels of therapy area experience typically found in niche CROs, with the geographic coverage and service scope found in a global partner. To that we add our best in class quality standards, industry leading metrics for on-time, on-budget project delivery, and a commitment to share our clients' goals which is just second nature for us.

Experience Overview

CROMSOURCE Vision has managed many ophthalmic trials since our inception. Notable indications in which we have experience include, but are not limited to:

- | | |
|---------------------------|-------------------------------|
| • AMD | • Blepharitis |

Our Expertise Ensures Your Success

CROMSOURCE Vision has a wealth of specialist experience in the development of medical devices and medicinal products in Ophthalmology. However, past experience alone is not enough to ensure successful development and completion of your project. To do this, CROMSOURCE Vision understands the importance of retaining our expert people and ensuring our clients receive a stable project team throughout the lifecycle of their study.

What this means for your project is:

 Project teams who have a complete understanding of the patient population, the operational challenges associated with recruiting and retaining subjects, and the strategies required to conduct these studies in a timely manner

 Staff who become part of your team, sharing with you their considerable experience and expertise of data management, statistics, medical writing, safety and regulatory processes in ophthalmology product development

 CRAs who are experienced in ophthalmology endpoints and data; this understanding ensures that monitoring is not merely a box-checking exercise, and that sites are managed effectively and quality data is delivered
